EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

4. The following is an examiner's statement of reasons for allowance:

The present application relates to providing a communication system and a method of communication between a synchronous digital hierarchy SDH network and an Ethernet network, including the unique steps of:

“the SDH network element being operative to request a status of the Ethernet network element when the SDH network element is required to update the SDH network management system with status information on the functionality of at least one of the SDH network element and the Ethernet network element, the direct connection between the SDH network element and the user termination element being used for determining if the user network termination element is functioning correctly.”

Art Unit: 2416

The closest prior art, Duplessis et al. (WO 01/100024 A2), discloses a communication system comprising a SDH network and an Ethernet network, wherein a SDH mapper converts information from a SDH format to an Ethernet format and a demapper to convert information from the Ethernet format back to the SDH format . However, Duplessis fails to anticipate or render obvious the above quoted limitations of the present application. This renders the claims allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
